

AZRB choose Repeat Signage for its flexibility to promote their business activities in Malaysia...

AZRB Group of Companies are involved in many activities which include dealing in marine fuels, lubricants and petroleum based products, investment holding and provision of management services.

Besides construction works, the Group is also expanding its business in other activities, namely oil and gas, property development and plantations. www.azrb.com

Over the past 30 years of its establishment in the industry, AZRB has seen much growth, progress, achievements and challenges. The Group continuously changed and improved to better meet new challenges and take on better opportunities.

For one of their construction projects, up to date information is vital. Hence, AZRB was sourcing for a digital signage software that can support various document format and to show media information as well. Repeat Signage was chosen because of its flexibility and ability to show various format, (page-turning PDF, video, documents, spreadsheets, images) that is taking place, with announcements and an attendance list that can be pumped up locally or centrally via HQ.

Designing a Repeat Signage presentation at AZRB

Greenscapes is a digital signage system company based in Malaysia that build, supply and design Interactive and non-Interactive signage system projects. They have more than 10 years experience in large format displays and digital media and undertake various turnkey projects.
