## Repeat Signage replaces paper notices on BLM's noticeboards

British Lead Mills (BLM) are proud of their reputation for producing quality Rolled Lead Sheet - all manufactured to BS EN12588, which ensures thickness consistency. The BLM site at Welwyn Garden City, Hertfordshire, which started production in 1932, is home the UK's most advanced rolling mills, state of the art robotic finishing lines and the UK's largest recycling facility for Lead recovered from construction demolition.

"We use the Repeat Signage software as a replacement for paper notices on noticeboards."

The information displayed on the screens includes everything from general staff

notices, safety announcements, Company news and job adverts and everyone has become very used to information being displayed in this way."

Roger D Riggs, IT Manager, British Lead

"We have setup our presentations so that the information is displayed in the centre of the screen with feeds at the top and bottom of the screen displaying news and sports headlines."

"The information is put together using PowerPoint which is very simple and allows us to use the transistions and effects from PowerPoint on our displays which makes them look both less staid and more professional."

Repeat Signage

Population of the Company of the Co

With Repeat Signage, you can insert various media including pictures, text, PowerPoint, documents such as Word and Excel, page-turning PDFs, in addition to RSS newsfeeds, real-time clocks, audio, video, webcams and web-browsers...

You can easily create your RSS feeds by setting up a free account on our <u>RepeatServer.com</u> online portal. This allows you to quickly add news items and once saved when you click publish, any Repeat Signage display screens connected to the Internet will automatically update messages.

You can also, if you prefer to amend messages locally, use a scrolling text label instead.

News feeds can be used to display welcome messages to visitors, give Health & Safety announcements, alert staff to fire drills, and even advertise jobs and display 'Happy Birthday' messages to your staff.

With Repeat Signage, you can download a trial edition onto a Windows computer to create their own designs. You only pay a one-off licence fee when you connect 1 PC to 1 display screen, or connect 1 PC to a 2, 3 or 4 screen video wall when using Repeat Signage Media Wall edition. Remote updating, along with 3,000 images and 4,000 icons are free-of-charge to use. Tel: 00 44 (0)1246 435821 www.repeatsoftware.com
