

Repeat Signage delivers information to all at West Yorkshire school

Rationale: The School was searching for a user-friendly, versatile and innovative platform on which to present key information, data, day to day activity in a clear, attractive and fresh way. Repeat Signage was the perfect solution in meeting all of these hard to meet needs.

“Excellent is the only word that should be used to describe the product, customer service, support and attention to detail that Repeat Software provide. It’s a pleasure to deal with such professionals!

The Repeat Signage digital signage software has provided us with an almost bespoke solution that companies, wanting to charge us thousands, still harass us with.” Marcus Newby, Head Teacher, Howard Park School.

Solution

I arrived in September 2015 and was eager to relaunch the school with new, fresh branding. This included re-inventing an unloved area into a vibrant and welcoming reception area. This included a large presentation space projecting key information to all stakeholders.

Initially we considered the ubiquitous PowerPoint but soon ran into the tedium of predictable transitions and graphics. By luck, good fortune sent Repeat Signage in my school's direction.

Repeat Signage was immediately a joy to use, enabling my staff and me to simply create stunning 'blue sky thinking' and tech savvy presentations that really do make an impact.

Design

We are still exploring new ways of using this software, we really like the RSS feeds, the subtle image transitions and the simplicity of use. We have now extended its use to our Children's Centre and Playground displays - all different with scheduling allowing real diversity.

Conclusion

We couldn't be happier with the impact of this software; its provided us with a unique way of presenting information to target audiences in a very stylish manner. We are constantly asked what the solution is; we always have pleasure in recommending Repeat Software.

You can download the evaluation software without giving your details.

Howard Park Community School

Howard Park Community School is a local authority school in Kirklees, West Yorkshire for pupils aged 3-11.

Digital download

Repeat Signage lets you insert pictures, text, clocks, shapes, .PDFs, etc., into your presentation. Then you save this and can schedule it to play over your local network at different times. For example, you could easily display school information 9-12am, then display lunchtime menu 12-1pm, followed by students' artwork. In the evening you can display advertisements whilst the theatre is in use, or other school based activities.

With Repeat Signage, you can download the software onto multiple Windows computers for students to create their own designs. You only pay for the license when displaying to a display screen, and site licences are available for displaying to multiple screens. Remote updating, along with 3,000 images and 4,000 icons are free-of-charge. T. 00 44 (0)1246 435821 www.repeatsoftware.com
