Repeat Signage user-friendly, professional digital signage software for Windows

www.repeatsoftware.com
Go from a blank screen to an attractive digital signage presentation

Repeat Signage is professional, user-friendly digital signage software. Turn a PC into a digital notice board or an advertising screen. You just need a Windows PC, a display screen and Repeat Signage digital signage software.

- Download Repeat Signage onto a Windows computer.

- Select ‘Create a presentation’ and start with a blank page or a template. Insert your logo, pictures, text, date and time, RSS feed, documents, video or other media to create your presentation and save it.

- Connect the computer to a display screen to play your presentations. You can design different presentations and create a playlist to display these at various times of the day or week.

www.repeatsoftware.com
At Caxton House, the corporate Head Office of our company and home of Caxton Magazines, we replaced our messy stick-on notice boards with electronic notice boards using Repeat Signage Standard edition digital signage software. Visitors can see the latest covers of our publications, and general notices and vacancies aimed at staff form part of our layout. We display marketing videos in another section.

With Repeat Signage software you can create a simple presentation quickly and easily to include:

- Company logo
- Date and time
- Playlist of pictures
- Corporate video
- RSS news feed, weather and offers...

And changing your content is easy - from your local network or remotely over the Internet from anywhere in the world.

“Tell your story in reception area...”

Riann Hattingh, IT Consultant, Caxton & CTP Publishers and Printers, S.A.
Showcase your school activities...

Digital signage is an ideal solution for schools looking for an easy way to deliver information to students or to get them more interested in current affairs.

You can include lunch-time menus, sports and music videos, local news, weather and announcements. Generate income with our advert templates to feature local fitness classes or piano lessons...

Insert your existing PowerPoint slides
You can insert your PowerPoint slideshows into Repeat Signage and these, along with other media, can be scheduled to display at different times of the day or week.

"Repeat Signage not only met our needs it has given us other options to think about we did not know were possible. We originally planned on inserting PowerPoint but Repeat Signage has expanded our abilities looking into other content we can use to showcase our school."

Aaron Kinz, Technology Teacher, Merryhill School, Roseville, California, USA

Westholme School proudly displays their school logo, timetable, events, RSS news feed and announcements
Healthcare patient information...

Providing patient information has never been more important. By displaying Repeat Signage presentations on your display screens, you can keep your patients updated on waiting times, healthcare services and important news.

Features include:
Text to speech for patient call
Spreadsheet of clinic times and data
Ability to change waiting times
RSS feeds for healthcare announcements
Care homes and nursing homes...

Care homes and nursing homes can benefit from showcasing their care facilities, maintain good communication and welcome residents and visitors with Repeat Signage digital signage software.

You can help your residents choose meals with picture menus in the dining area. Playlists of menu pictures, designed to tempt tastebuds, can be scheduled in Repeat Signage software, to automatically display at various times of the day or week.

A playlist of photos of residents participating in activities, birthday celebrations or memorabilia can be displayed to entertain residents, or a video of gentle exercises.

Reduce staff hand-over time by displaying important information on a display screen in the nurses station.

Advertise local services such as hairdressing, to generate an income.
We launched our restaurant in London. It features self-service touch screen technology and a digital menu board using Repeat Signage Media Wall digital signage software. The concept at Velo is simple. Customers use the display screens above the counter to see the menus. Orders can be placed and paid for at the self-service touch screens, sited along the rear wall. The order is then collected at the pick up counter.

Displaying meal-time options at different times of the day and seasonal offers is paramount for busy shoppers and travellers using the growing number of quick service restaurants. Single display screens or a 4-screen digital menu board above the counter helps customer choice.

For leisurely evening dining in restaurants, Repeat Signage presentations can tempt diners with images of delicious dishes, scrumptious desserts and tasty offers.

Hotels, weddings, dining and spa...

How guests are greeted and welcomed on arrival at your hotel reception always makes an impression.

Guests waiting in reception area or lounge areas can leisurely browse the display screens, showcasing your hotel services which then encourages eating-in, enjoying the spa and other facilities.

Your hotel, in luxury grounds or beachside setting, may specialise in weddings. By showcasing a playlist of beautiful pictures of couples and their guests celebrating happy events, guests may visualise their own celebrations at your hotel, thus helping you to increase bookings.

Perhaps guests who have booked rooms to attend the hotel wedding reception are not aware you have a fitness center, spa and beauty facilities, and using digital signage software on display screens, helps you to promote these. You can even advertise spa products using Repeat Signage’s advert templates.

Repeat Signage sample presentations for hotels forthcoming events and wedding receptions

Whatever you are celebrating, from weddings to family parties, our chefs are on hand to offer you a range of delicious menu options.
Support has been excellent and I have never been disappointed. Quick response times along with personal service rates this company very high in my personal satisfaction. I have, and will continue to recommend this company to others.

Justin McNaughton, Information Technology Specialist, Harrisburg International Airport, Central Pennsylvania

You can include:
Menus from the in-built spreadsheet
Playlist of product images
Destination video of local attractions
RSS news feeds...

You can generate an income with Repeat Signage’s advert templates, by advertising travel terminal shops, restaurants, premier lounges, car hire and other amenities.

Display your travel services for your passengers and staff on indoor or outdoor display screens with Repeat Signage.

Travel info - where to eat, shop, relax...

Harrisburg International Airport displaying Repeat Signage presentations on outdoor displays at its shuttle bus stops
Shoppers look to digital signage display screens, video walls and touch screens to provide way-finding, information and news of shopping mall events.

Display screens positioned in key areas not only help shoppers but allow individual stores to advertise their products and services.

Optima Digital Inc. is a leading post production and digital services house, providing advertising and entertainment experiences, and the supply and installation of display screens in the Philippines.

“We install Repeat Signage software in retail stores in the Philippines. To date, we have more than 60 PLDT stores where Repeat Signage software is being used. PLDT is the country’s leading telecommunications company in the Philippines. It is being used to show their latest video ads, and in-store promotions.”

Jill Toren-Palmes, Optima Digital, Inc., Philippines
Promote your shops and brands...

A display screen, promoting your products and services, keeps shoppers informed and helps you increase sales.

You can create presentations including your logo, dynamic images, video and scrolling RSS newsfeeds to showcase your brands to best advantage.

You can schedule different presentations to be displayed on display screens at various times of the day or week, to promote special offers and events.

Where you have several shops in different locations, you can create your presentations on your computer from a central place, and update content on the screens remotely over the Internet.

Repeat Signage Media Wall edition software allows you to connect 2, 3 or 4 display screens to a Windows PC, to show different content on each screen or a single image spanning across all the screens on the video wall, in either portrait or landscape mode.
Leisure industry and tourism...

Repeat Signage has many customers in the leisure and tourism industries, across radio stations, tourist offices, hotels and bowling alleys, using digital signage presentations to promote their activities and facilities.

Repeat Signage supports Unicode for the display of Chinese, Japanese, Russian, Greek and other country characters.

“The Indiana State USBC Bowling Association has been extremely pleased with Repeat Signage software. We highly recommend Repeat Signage as it gives us a very professional looking and technology advanced image to our events for our bowlers. It is environmentally friendly and cost effective, saving printing and toner costs.

The team at Repeat Software are great people to work with. They are very responsive and have a genuine interest in your satisfaction.”

Brian K Nunning, IS USBC BA Technical Manager, Indiana State USBC Bowling Association
For the last 5 years I have been looking for a simple to use option for digital signage that would work in our Martial Arts Academy for the parents to watch while classes are running.

Repeat Signage allows me to advertise to clients, connect to rss feeds and create better branding without paying a monthly fee and having to eat up your internet bandwidth.

The staff are great to deal with and respond to your questions fast. Having used it for months now we have had no issues and have had more students register for events at a faster rate without having to seek them out.

Exhibition stands and showrooms

There are occasions when you would like to display your digital signage presentations on small or large display screens, and for whatever reason, you cannot access the Internet and need a standalone solution.

Repeat Signage Standalone edition, once downloaded from the Internet onto a Windows computer, allows you to insert your logo, text, images, video, documents and other digital media to create your presentations to display them on a screen without accessing the Internet.

A Standalone solution, where your content is updated manually, is ideal for exhibition booths, in show houses on building plots or for outdoor events such as airshows or concerts.

At a medical exhibition, a Repeat Signage presentation featured a pop quiz in a playlist of questions and answers; a static image displaying logo and kiosk displays which the exhibitor was promoting, whilst the right hand side of the screen demonstrated the patient call feature within Repeat Signage.
We make use of RSS feeds a lot, also using the RSS feed facility provided by Repeat Signage for quick editing and display our company, staff and building related information and announcements - even birthdays and canteen specials.

During marketing and important corporate events, we do live streaming via YouTube from the event and display that to the staff on all the floors and some boardrooms. We use various presentations during different parts of the day and week, or during events, scheduling them with the play lists facility.

“...”

We are a 3PL logistics company specializing in e-commerce, wholesale, retail distribution on behalf of our clients. We are using Repeat Signage to display the KPI dashboard to show the pending status of all orders and in what stage they are in so all employees and top management are always on top of what is going on and can easily react to any delays or related issues. When our clients visit they are also pleased to see the live data and even estimate the speed of work progress.

Igor Pestrikov, MODAEXPRESS USA
Secaucus, New Jersey.

Repeat Signage allows you to quickly produce professional quality digital signage presentations and play it on a variety of displays including large format display screens, video walls and projectors.

Repeat Signage is easy to use. After downloading the software onto your Windows computer, you insert a variety of digital media into a template. Double clicking any of media will give you options, for example, changing font, size and colours of text, opting to display static or playlists of images, changing time zones, etc.

What attracted me to Repeat Signage software was the flexibility of the different media that could be used, the ease of building a presentation. The online tutorials help me build the basics giving a dynamic moving display, I quickly added more complex graphics. The other big benefit was to do this without committing any money, I was then able to give a live demonstration to senior management without compromise. The approval to spend the money was instant.

Nigel Luker, Active Electronics, UK.
RepeatSignage digital signage software

Promote your business on display screens, video walls or touchscreens

To create your presentations, start with a blank screen or template and insert any of the following media:

- Animated gif (or svg)
- Audio
- Banner text and pictures
- Clocks (text based)
- Date and time
- HTML5 video
- PDF/Document/PowerPoint
- Pictures or playlist of pictures
- PowerPoint presentation scheduler
- RTF document
- RSS scroller
- Shapes
- Spreadsheet (or create grid)
- Text label (single line of text)
- Text block (rich text block)
- Webcam
- Web browser
- Data grid (database support) in the Corporate and Media Wall Edition

Why Repeat Signage?
The Repeat Software team give you an outstanding level of support. We give you free email technical support, training videos, sample presentations and we have satisfied customers in over 30 countries worldwide.
