Simple to use digital signage software
for display screens, projectors and video walls
Internet and network updatable
Windows 10 & 11

Repeat Signage at MultiNet Interactive AB, Sweden

 **Repeat Signage** Create, manage and display your digital content

Simple to use digital signage software for any screen, anywhere

Quick and easy to use, with Repeat Signage you can create, schedule, manage and play engaging digital signage presentations on any size display screen, anywhere.

Trusted by clients across multiple applications in over 30 countries.

- Download Repeat Signage onto a Windows computer.
Free trial (no details needed)
- You may find your Microsoft skills are easily transferable to Repeat Signage, for example, when you insert images, you resize and move around the screen (drag and drop) to create your presentations. You can insert text, date, time, RSS feeds, video, audio, QR codes, spreadsheets, documents, webcam, database info and other digital media.
- Connect your Windows device to a display screen to play and schedule presentations. Internet and network updatable software. Standalone option.

Showcase your school activities...

Digital signage is an ideal solution for schools looking for an easy way to deliver information to students or to get them more involved in the school community.

You can include lunch-time menus, drama and music videos, local news, weather and announcements. Generate income with advert templates when school facilities are used in the evening for theatre productions, fitness classes or sporting events.

You can insert your PowerPoint slideshows into Repeat Signage and these, along with other digital media, can be scheduled to display at different times of the day or week.

“Repeat Signage not only met our needs it has given us other options to think about that we did not know were possible. We originally planned on inserting PowerPoint but Repeat Signage has expanded our abilities looking into other content we can use to showcase our school”

Aaron Kinz, Technology Teacher,
Merryhill School, Roseville, California, USA

Westholme School proudly displays their logo, timetable, events, local weather and RSS feed news and announcements

Merryhill School, California, USA

Sandwell Academy, United Kingdom

Sports academies and fitness centres

Sports academies, such as the Canadian Black Belt Academy (CBBA) in Ontario, are finding Repeat Signage software an ideal solution for creating and updating their own digital content in-house from a Windows computer onto display screens.

“For the last 5 years I have been looking for a simple to use option for digital signage that would work in our Martial Arts Academy for the parents to watch while classes are running.

Repeat Signage allows me to advertise to clients, connect to rss feeds and create better branding without having to eat up your internet bandwidth.

The staff are great to deal with and respond to your questions fast. Having used it for months now we have had no issues and have had more students register for events at a faster rate without having to seek them out.”

Jason Figliano, Owner and Chief Instructor,
Canadian Black Belt Academy (CBBA)
Bolton and Tottenham, Ontario, Canada

Healthcare patient information...

Providing patient information has never been more important. By displaying Repeat Signage presentations on your display screens, you can keep your patients updated on waiting times, healthcare services and important news.

Features include:

- Ability to change waiting times (.txt file)
- Text to speech for patient call
- Spreadsheet of clinic times and data
- RSS feeds for healthcare announcements

Care homes and nursing homes...

Care homes and nursing homes can benefit from showcasing their care facilities, maintain good communication and welcome residents and visitors with Repeat Signage digital signage software.

You can help your residents choose meals with picture menus in the dining area. Play lists of menu pictures, designed to tempt tastebuds, can be scheduled to automatically display at various times of the day or week.

A play list of photos of residents participating in activities, birthday celebrations or memorabilia can be displayed to entertain residents, or a video of gentle exercises.

Reduce staff hand-over time by displaying important information on a display screen in the nurses station by adding messages on a computer .txt file to automatically update the display screen.

Advertise local services such as hairdressing, to generate an income.

A Warm Welcome to our Elderly Care Home

Summertime and residents enjoy outdoor activities

TODAY'S ACTIVITIES

- 10.30 Arts and crafts
- 2.30 Sing-along with Jeff
- 2.30 Sound of Music movie
- 4.00 Memory boxes

TODAY'S LUNCH

- Vegetable lasagne
- Pizza and chips
- Egg and cheese salad

Happy Birthday Alison

90 today

FIRE ALARM TESTING

- Sam in the morning
- Manager in at 10am for resident review meeting
- Barbara's daughter attending

Schedule presentations
Schedule your presentations to play at various times of the day or week

View meal choices on digital menu boards...

Displaying meal-time options at different times of the day and seasonal offers is paramount for busy shoppers and travellers using the growing number of quick service restaurants. Single display screens or a 4-screen digital menu board above the counter helps customer choice.

For leisurely evening dining in restaurants, Repeat Signage presentations can tempt diners with images of delicious dishes, scrumptious desserts and tasty offers.

“ We launched our restaurant in London. It features self-service touch screen technology and a digital menu board using Repeat Signage digital signage software. The concept at velo is simple. Customers use the display screens above the counter to see the menus. Orders can be placed and paid for at the self-service touch screens, sited along the rear wall. The order is then collected at the pick up counter. ”

Nghi Nguyen, founder of Velo Restaurant Ltd.,
Tooley Street, London Bridge, London, UK

YOWI DELI, Singapore, displays Repeat Signage presentations for their take-away service. “Worth it’s weight in gold”, says owner Jason Thai, YOWI Deli

Shopping centres and retail chains...

Shoppers look to digital signage display screens, video walls and touch screens to provide way-finding, information and news of stores and shopping mall events.

With Repeat Signage software you can broadcast your message to all or selected screens remotely over the Internet with a free RepeatServer.com account. The screen players can be on the same site or anywhere in the world as long as each has Internet access.

Optima Digital Inc. is a leading post production and digital services house, providing advertising and entertainment experiences in the Philippines.

Repeat Signage Media Wall software displays PLDT stores latest video ads and in-store promotions in more than 60 PLDT stores in the Philippines

“ We install Repeat Signage software in retail stores in the Philippines. To date, we have more than 60 PLDT stores where Repeat Signage software is being used. PLDT is the country's leading telecommunications company in the Philippines. It is being used to show their latest video ads and in-store promotions. ”

Jill Toren-Palmes, Optima Digital Inc., Philippines

Repeat Signage in the Quayside Shopping Centre, Sligo, Ireland

Repeat Signage sample presentation

City centres promote shops and events...

Engage shoppers with eye-catching digital signage on indoor and outdoor display screens, promoting products, services, offers and events for increased sales and return visits by locals and tourists.

You can create presentations including your logo, play lists of images, video and scrolling RSS newsfeeds to showcase your high street store to best advantage.

You can schedule different presentations to be displayed on display screens at various times of the day or week.

Where you have several shops in different locations, you can create your presentations on your computer from a central place, and update content on the screens remotely over the Internet.

Repeat Signage Media Wall edition software allows you to connect 2, 3 or 4 display screens to a Windows PC, to show different content on each screen or a single image spanning across all the screens on the video wall, in portrait or landscape mode.

Independent high street shops

Shopkeepers can promote their goods and offers with a play list of images, text and announcements on a display screen inside their store or on their shop windows.

Repeat Signage software is easy to use and you can create engaging content, adverts, special promotions and information, all without having to impart that information to individual shoppers.

Anyone with good computer skills should be able to create a presentation in minutes. There are templates within Repeat Signage that allow you to replace our images and text with your own, rather than starting from a blank template. Free video tutorials and email support.

For charity shops and second hand shops who also sell items by eBay auction, Repeat Signage includes an auction template which links into your eBay account to display your auctions items.

This lets shoppers know about additional items for sale and when the auction ends, to encourage them to bid for items.

Repeat Signage sample presentation for charity shops

Display eBay auctions on charity shop windows

You can link Repeat Signage to your eBay account and Repeat Signage can display your eBay auctions on a display screen.

This is ideal for charity shops, book shops, comic shops, second hand stores, etc., who also sell their goods on eBay and want to display and advertise their online auctions in their shop or shop windows 24/7.

To make it easy for you to display your eBay auctions, Repeat Signage includes an auction template.

Once you have connected to your eBay account, you can view all the auctions on your account with a preview picture next to each.

You can customise the auction template, for example, choosing which text to display, currency, etc. You can also replace our logo, QR code and text along the top of the template with your own.

Travel info - where to eat shop relax...

Display your travel services for your passengers and staff on indoor or outdoor display screens with Repeat Signage.

You can include:

- Menus from the in-built spreadsheet
- Play list of product images
- Destination video of local attractions
- RSS news feeds...

You can generate an income with Repeat Signage's advert templates, by advertising travel terminal shops, restaurants, lounges, etc.

“For the first time in almost five years, I was asked to update the presentation that Repeat Signage is displaying. It was just as easy as I remembered. I had the update done and displaying in just minutes. I can't tell you how happy we have been with the product. It has been working 24 hours a day for over 6 years now and has not missed a beat. Thanks again for an amazing product.”

Justin McNaughton, Information Technology Specialist, Harrisburg International Airport, Central Pennsylvania

Hotels - conferences weddings dining spa...

How guests are greeted and welcomed on arrival at your hotel reception always makes an impression.

Guests waiting in reception area or lounge areas can leisurely browse the display screens, showcasing your hotel services which then encourages eating-in, enjoying the spa and other facilities.

Your hotel, in luxury grounds or beachside location, may specialise in weddings. By showcasing a play list of beautiful pictures of couples and their guests celebrating happy events, guests may visualise their own celebrations at your hotel, thus helping you to increase bookings.

Perhaps guests who have booked rooms to attend the hotel wedding reception are not aware you have a fitness center, spa and beauty facilities, and using digital signage software on display screens, helps you to promote these. You can even advertise spa products using Repeat Signage's advert templates.

Leisure industry and tourism...

Repeat Signage has many customers in the leisure and tourism industries, across radio stations, tourist offices, hotels and bowling alleys, using digital signage presentations to promote their activities and facilities.

Repeat Signage supports Unicode for the display of Chinese, Japanese, Russian, Greek and other country characters.

“The Indiana State USBC Bowling Association has been extremely pleased with Repeat Signage software. We highly recommend Repeat Signage as it gives us a very professional looking and technology advanced image to our events for our bowlers. It is environmentally friendly and cost effective, saving printing and toner costs.

The team at Repeat Software are great people to work with. They are very responsive and have a genuine interest in your satisfaction.”

Exhibition stands and showrooms

There are occasions when you would like to display your digital signage presentations on small or large display screens, and for whatever reason, you cannot access the Internet and need a standalone solution.

Repeat Signage Standalone edition, once downloaded from the Internet onto a Windows computer, allows you to insert your logo, text, images, video, documents and other digital media to create your presentations to display them on a screen without accessing the Internet.

A Standalone solution, where your content is updated manually, is ideal for small exhibition booths, in show houses on building plots or for outdoor events such as at airshows, showgrounds and concerts.

At a medical exhibition, a Repeat Signage presentation featured a pop quiz in a play list of questions and answers; a static image displaying logo and display screens which the exhibitor was promoting, whilst the right hand-side of the screen demonstrated the patient call feature ideal for surgeries.

Tell your story in reception area...

“ What attracted me to Repeat Signage was the flexibility of the different media that could be used, the ease of building a presentation package. The online tutorials helped me build the basics giving a dynamic moving display. The other big benefit was to do this without committing any money. I was able to give a live demonstration to senior management without compromise. Approval to spend the money was instant. ”

Nigel Luker, Kitting and Assembly Manager, Active Electronics, United Kingdom

“ At Caxton House, the corporate head office of our company and home of Caxton Magazines, we replaced our messy stick-on notice boards with electronic notice boards using Repeat Signage software. Visitors can see the latest covers of our publications and general notices and vacancies aimed at staff form part of our layout. We display marketing videos in another section. ”

Riann Hattingh, IT Consultant, Caxton & CTP Publishers and Printers, S.A.

Watergate Apartments, Melbourne, Australia

Active Electronics, United Kingdom

Boardrooms and conference facilities

Repeat Signage's in-built spreadsheet grid allows sales graph figures and other information to be displayed on screen, ideal for boardrooms and financial institutions.

With the iCal feature you can display your calendar in text or pictures on your display screen, keeping staff updated with scheduled meetings and appointments.

“ We make use of RSS feeds a lot, also using the RSS feed facility provided by Repeat Signage for quick editing and display our company, staff and building related information and announcements - even birthdays and canteen specials.

During marketing and important corporate events, we do live streaming via YouTube from the event and display that to the staff on all the floors and some boardrooms. We use various presentations during different parts of the day and week or during events, scheduling them with the play lists facility.”

Riaan Hattingh, IT Consultant,
Caxton & CTP Publishers and Printers, S.A.

Corporate edition displays key messages to widely dispersed staff

At Minerallac Company, the Repeat Signage Corporate software has been a very useful tool to help keep all of our staff informed on events and critical performance information. With most of our staff working in warehouse operations or remote, it was always difficult to share up to date information.

With Repeat Signage and a few large screen TVs, we are able to present a dynamic 10-15 minute slideshow presentation displaying a wide range of information to our staff that would normally only be available through an email or talked about during our quarterly updates.

Staff in our satellite location (2,000 miles away) often felt out of touch with our main warehouse in Illinois. With Repeat Signage we are able to display the same information in their warehouse with no additional effort.

Erik Hilty, Minerallac Company
Electrical Construction Hardware Manufacturer

Corporate edition displays database info ideal for e-commerce wholesale distribution

Repeat Signage Corporate edition software has the same features as the Standard edition, plus the ability to collect and display content from a database.

MODAEXPRESS USA, chose the Corporate edition of Repeat Signage to display the KPI dashboard to show the pending status of their orders. Ideal for e-commerce, wholesale and distribution.

“ We are a 3PL logistics company specializing in e-commerce, wholesale, retail distribution on behalf of our clients. We are using Repeat Signage to display the KPI dashboard to show the pending status of all orders and in what stage they are in so all employees and top management are always on top of what is going on and can easily react to any delays or related issues. When our clients visit they are also pleased to see the live data and even estimate the speed of work progress.”

Igor Pestrikov, MODAEXPRESS USA
Secaucus, New Jersey, USA.
